Deliver high quality products on time which is important to us.
A partner you can rely on.

All the best from Denmark
Ole, NOTEM

Working with BALTS is great, the company finds perfect solutions to our specific needs.

Best Regards from Estonia
Ave, Apollo Kauplused OÜ

We have been working with BALTS for several years now.

Over the years, we have been really pleased with the product quality, timely delivery and the relationship we have built.

The attention to detail and commitment to excellence has truly exceeded our expectations.

The team at BALTS is incredibly responsive and helpful throughout the entire manufacturing process, making it as smooth as possible and dealing with problems very promptly.

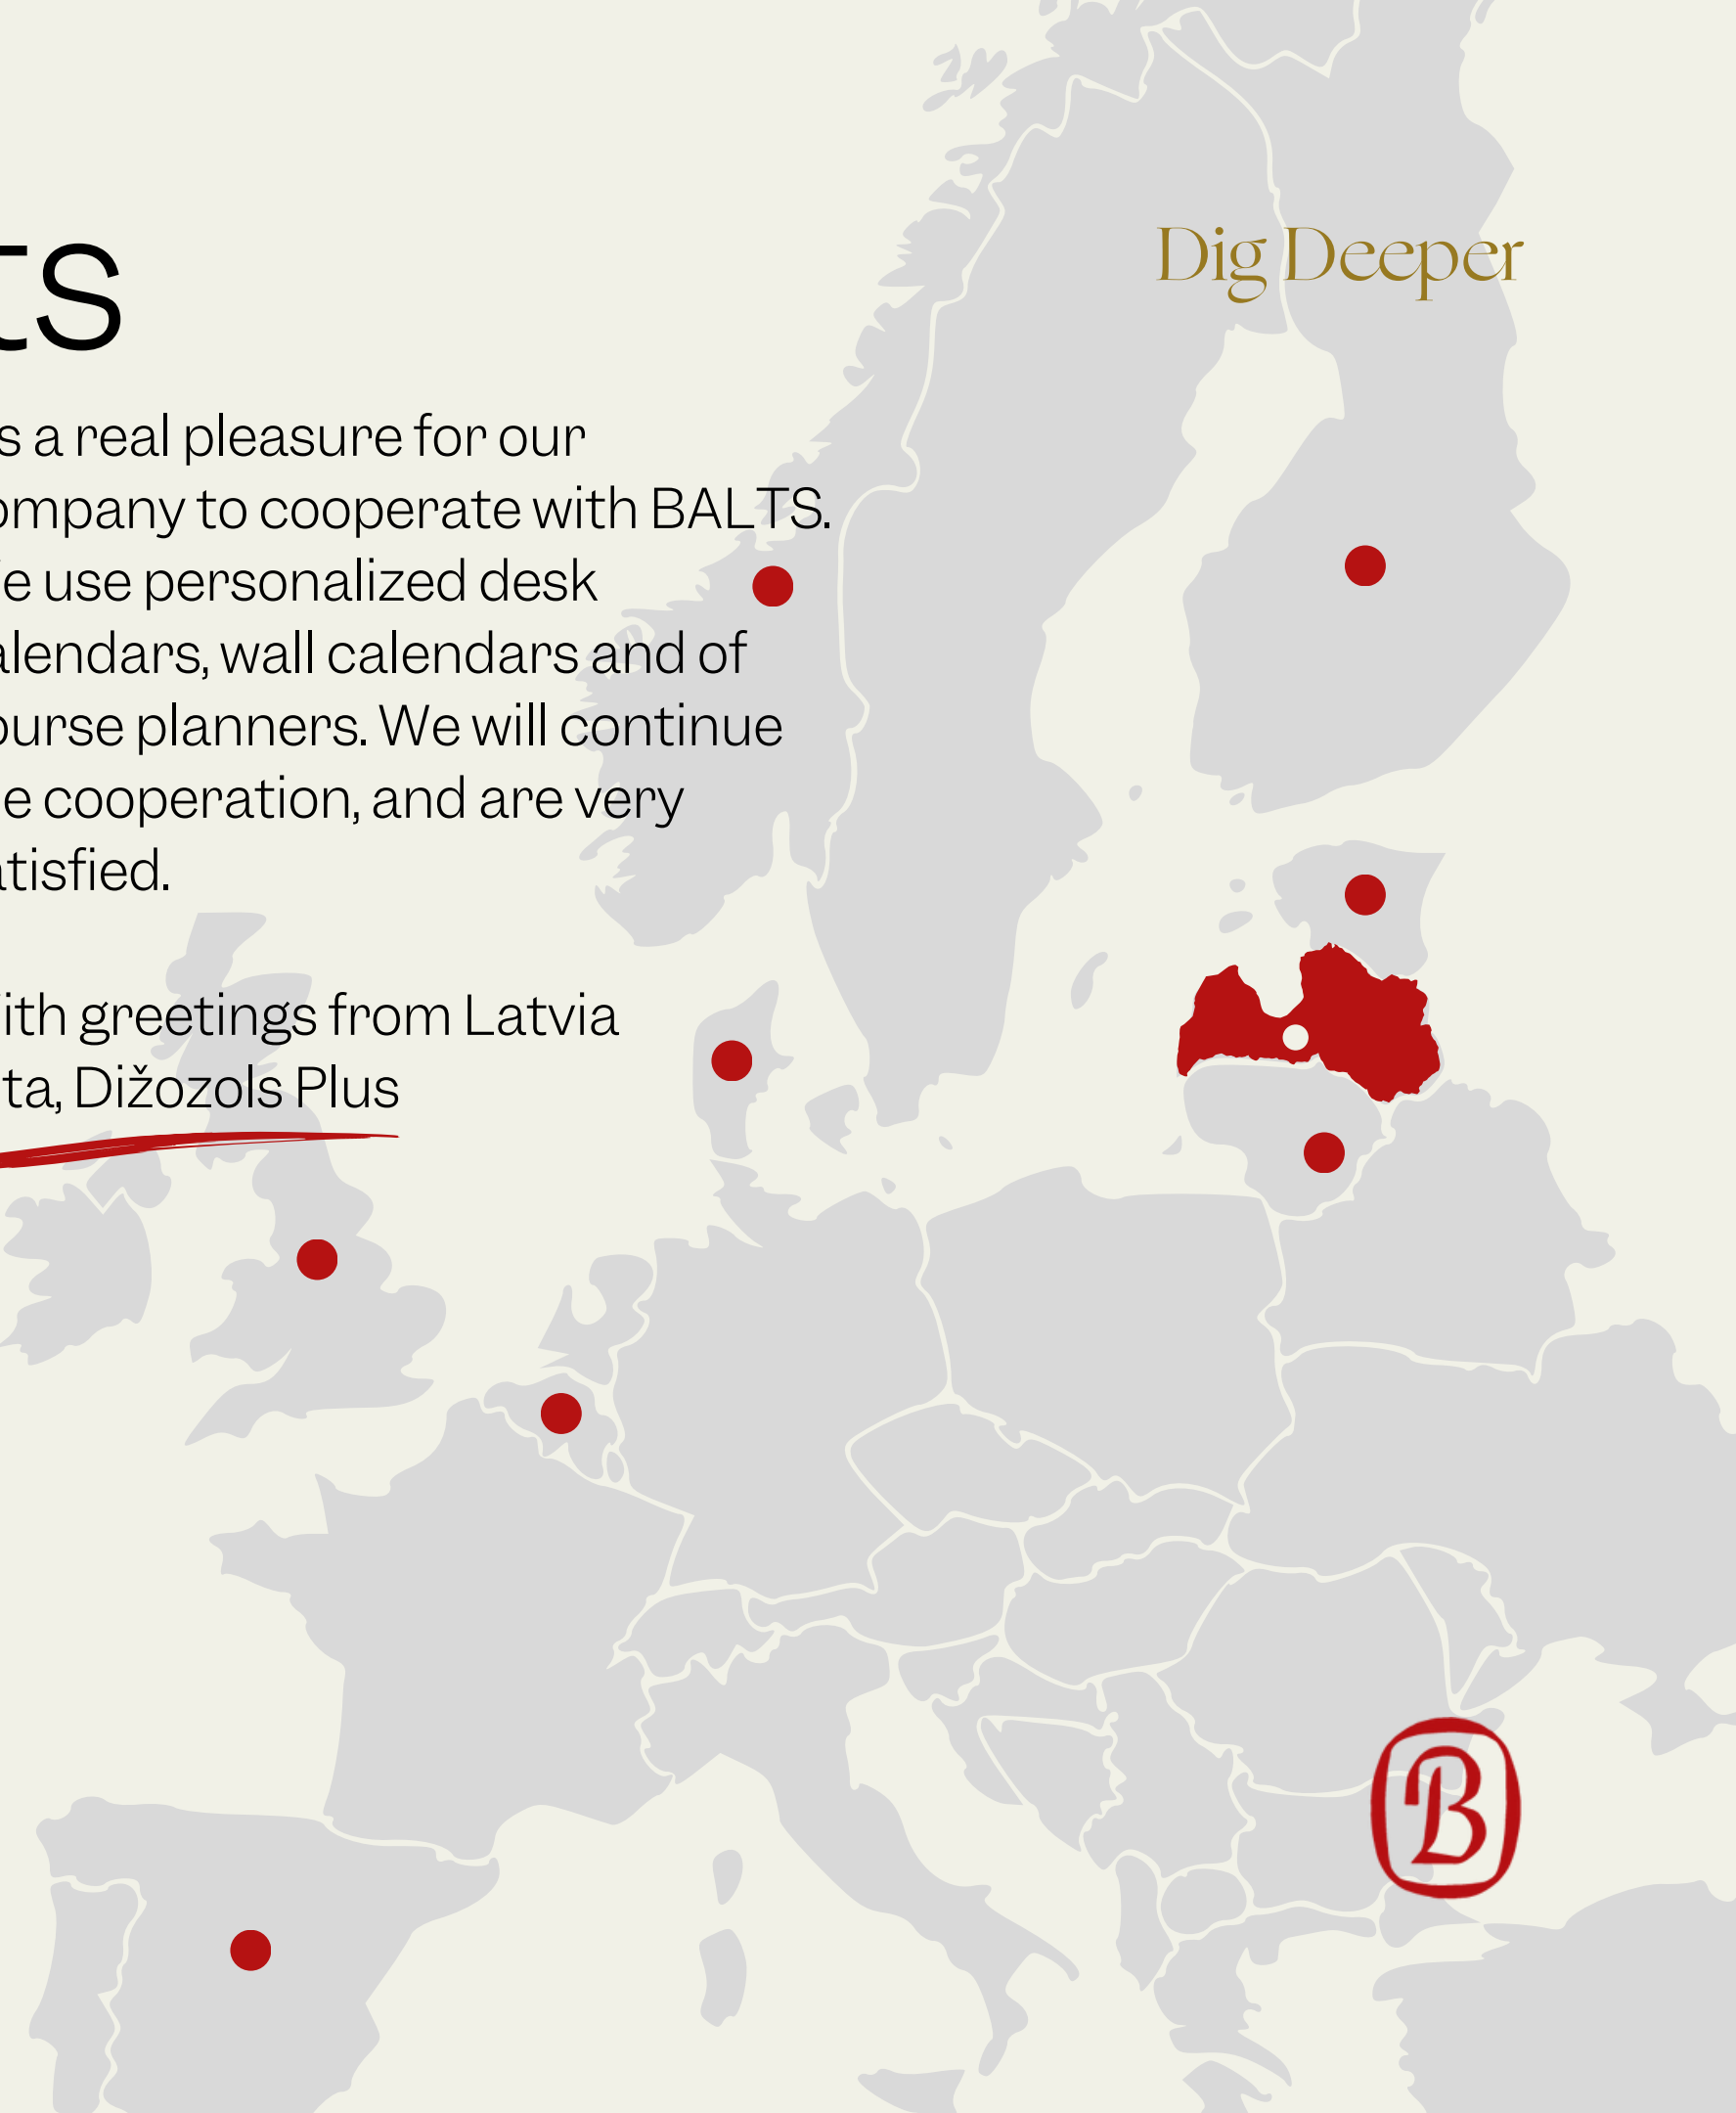

We look forward to continuing our partnership and working with BALTS on our future projects.

With greetings from UK
Baiba, The Inspired Stories

It's a real pleasure for our company to cooperate with BALTS. We use personalized desk calendars, wall calendars and of course planners. We will continue the cooperation, and are very satisfied.

With greetings from Latvia
Gita, Dižozols Plus

Dig Deeper

Environmentally conscious

Dig Deeper

Our products are manufactured in our parent company's factory, where the following certificates are accessible.

Forest Stewardship Council

FSC™ certification confirms that we use paper from forests that comply with rigorous environmental, social and economic standards as well as responsible forest management.

The ClimateCalc certificate, obtained for the first time in May 2022, certifies the compliance of with the requirements for the use of the Carbon Emissions Calculation Method.

The Nordic Swan Ecolabel certification was created in 1989 at the request of the Nordic Council of Ministers with the aim of creating a product labelling system that would promote consumption of environmentally sustainable products. The label guarantees among other things that climate requirements are taken into account, and that CO2 emissions are minimized.

The certificate confirms that the plant uses electricity from renewable energy sources - water, wind and solar.
